National Intercollegiate Soccer Officials Association

A COMPARATIVE STUDY OF RULES AND LAWS

Many NISOA members officiate soccer matches using Rules and Laws of soccer organizations and rule-making bodies other than the NCAA. As is to be expected, officials on occasion have some confusion regarding a specific rule or interpretation. For these reasons a study guide is needed for the officials to have easy references to the differences between NCAA, High School Federation Rules and IFAB Laws and of the Game. Over the past twenty-five years the more **significant** rules have been brought generally into conformity by the three groups. Nevertheless, there are distinct differences in language and interpretation that still exist and each group has adopted specific rules that are believed to be more appropriate for their players and their ages. This guide is not an all-inclusive listing of each difference between the sets of Rules and Laws, but rather only lists the more important differences where such differences exist. Many technical and administrative rules such as player eligibility and accumulated cautions do not generally and directly concern the referee but rather the match administrators and have therefore been omitted from this study.

The guide has been designed by the author for easy reference and many officials have carried this guide in their kit or in their cars for quick review prior to a match. It is also useful as a teaching aid for NISOA entry level and in-service clinics. Changes for the current year are shown in *italics* for easy reference. The comparisons are in tabular form following the particular topic and are in order of the specific Laws or Rules to which they are relevant except for the listing on page 3 which compares general Topics not referred to in specific Rules or Laws and several miscellaneous topics which are referred to on page 15.

It should be noted that the three sets of Rules and Laws are constantly changing and the different bodies publish their changes at different times of the year. Generally the IFAB Laws of the Game are published in May and take effect the following June. The NCAA Rules are enacted early in the year, but are not normally published until early or mid summer. High School Federation rule changes are enacted by their Rules Committee each January and are distributed in early summer. The NCAA Rule Book is only published every other year. A new edition will be published next year. Accordingly, this Guide is current only up to the date of its publication and includes all rules changes for the year as presently known by the author. If any errors are noted, it would be appreciated if they are brought to attention of Don Dennison at donsar@comcast.net.

NOTE: Modifications for the 2017 season are shown in *italics*.

Interpretations	Approved Rulings (A,R.) appearing in the Rule book are official decisions of the NCAA. The NCAA secretary/rules editor can be contacted for interpretations. Generally it is preferable to first go through the local NISOA Chapter Clinician. The NCAA Rules Book does NOT contain the description of standardized procedures for the Diagonal System of Control (DSC). NISOA describes this system for its members in other publications.	Play Rulings in the Rules book are interpretations approved by the NFHS Soccer Rules Committee. Member state associations of the NFHS independently make decisions regarding compliance with or modifications of the playing rules for the student athletes in their respective states. The Rules describe 3 systems of mechanics that may be used; the Dual Officiating System, The Diagonal System of Control (DSC) and the Double-Dual System.	Decisions of the Int'l. F.A. Board are official interpretations. Additional Interpretations in the U.S. can be obtained initially through the State Director of Instruction (SDI). The USSF Advice to Referees and Questions and Answers on the Laws of the Game are also official sources in the U.S. The Diagonal System of Control (DSC) is described in other IFAB and USSF publications.

Footnote to the IFAB Offside Law 11 concerning interpretation of “INTERFERING” and “GAINING AN ADVANTAGE”.

“Interfering with an Opponent” means preventing an opponent from playing or being able to play the ball by clearly obstructing the opponent’s line of vision or movement for challenging an opponent for the ball.

“Gaining an Advantage” by being in an offside position means playing a ball that (1) *rebounds or is deflected* to him/her off the goal post, crossbar or an opponent; (2) that *rebounds or is deflected* to him/her from a deliberate save by an opponent; (3) receiving the ball from an opponent who *deliberately* plays the ball such as a miskick or misdirected header (except for a deliberate save), is not considered to have gained an advantage and is not offside.

IFAB Law 12 regarding DOGSO: In IFAB Laws of the Game, if the offense occurs inside the penalty area a penalty kick is awarded. A caution is awarded if the foul was an attempt to play the ball. It’s still a penalty kick and a red card for handling, holding, pushing, pulling or violent conduct and serious foul challenges. If direct free kick offense occurs outside of the penalty area, and denies an obvious goal, a red card is given. *This is also in effect for NCAA.*
